

The Brittany Advocate

President's Corner **By Sue Spaid**

NBRAN coordinators are the best! Our coordinators do outstanding work managing NBRAN dog intakes and adoptions. Some days it can be a difficult job, but they are truly a team and collaborate daily for success across U.S. and Canada!

On February 5, we held our annual coordinators meeting, virtually. It was wonderful for everyone to connect, meet, and put faces to names. During our ninety-minute meeting, we shared so many heart-warming stories, troubleshooted challenges, celebrated success and just had fun!

One exciting initiative that from this meeting is an NBRAN Foster Stories book. This book will share our foster volunteers' experiences - the joys and the hardships. This book is planned to help us recruit new fosters and have our current fosters share their journey. The regional directors and coordinators reached out to their fosters to collect story submissions. We are excited to have an NBRAN volunteer, who is published author, who wants to spearhead and publish this book.

The second initiative from our annual meeting is to host Facebook Live events to engage with our supporters. Watch NBRAN's Facebook for a poll on topics and help pick the final topics for discussion during these events. Watch for our Facebook live event this spring!

As I mentioned before, the coordinators meeting was such a success, and everyone was very happy they attended. It was great to have everyone **connect and collaborate**. Our goal is to meet three times a year, with the next meetings happening in summer and fall.

NBRAN would not exist if not for these hardworking and dedicated folks. The next time to talk to an NBRAN coordinator, tell them, "Thanks for working hard to save our beautiful Brittanys!"
